

Dharnish V

Specialization in Artificial Intelligence and Machine Learning
+91 7094950944 | dharnidharni2356@gmail.com | LinkedIn | GitHub | Portfolio

CAREER SUMMARY

Aspiring Computer Science (AI ML) undergraduate with hands-on experience in full-stack development, AI/ML, computer vision, and cloud-based application development. Proficient in Python, Java, JavaScript, RestAPI, React.js, SQL, Docker, and AWS, with a strong foundation in data structures, algorithms, and scalable software engineering.

EDUCATION

JAIN (Deemed-to-be University), FET <i>B.Tech – Specialization in Artificial Intelligence and Machine Learning, CGPA: 8.87</i>	Bangalore 2023 – 2027
Chellammal Matric Higher Secondary School <i>12th Standard, 90%</i>	Trichy 2022 – 2023
Chellammal Matric Higher Secondary School <i>10th Standard, Completed as per state board evaluation policy</i>	Trichy 2020 – 2021

PROJECTS

Smart Vehicle and Dock Management System | *Python, Flask, React.js* | Live Demo

- Developed a Vehicle Management System (VMS) for factory logistics to manage vehicle entry, queue tracking, dock allocation, and vehicle movement.
- Built a real-time dashboard for monitoring vehicle status, dock utilization, and operational KPIs.
- Implemented role-based access, notifications, and reporting to improve vehicle turnaround time and warehouse efficiency.

Synapse AI: Meeting Intelligence Platform | *Next.js, RestAPI, PostgreSQL, Gemini, Docker, AWS* | Live Demo

- Built and deployed an AI-powered SaaS platform that transcribes meeting audio, generates intelligent summaries, extracts action items and decisions, and enables semantic search across meeting history using Google Gemini.
- Engineered a scalable full-stack architecture with Next.js, FastAPI, REST APIs, PostgreSQL, and Docker, deploying the application on AWS with a focus on performance, security, and production-ready cloud infrastructure.

VisionGuard AI – Real-Time PPE Detection System | *Python, YOLOv8, OpenCV, React.js, Docker, AWS* | Live Demo

- Developed a real-time computer vision system that detects Personal Protective Equipment (PPE) compliance from live video streams using YOLOv8 and OpenCV to improve workplace safety.
- Built and deployed a FastAPI-based monitoring dashboard with real-time alerts, violation logging, Docker, and AWS for scalable industrial safety monitoring.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Core CS: DSA, OOPs, OS, DBMS, CN

Software Development: REST APIs

Web Development: HTML, CSS, Js, React.js, Flask

AI/ML: Machine Learning, Deep Learning, RAG, LLMs, Prompt Engineering, LangChain, NLP, YOLOv8, TensorFlow

Databases: PostgreSQL

Tools & Platforms: Git, GitHub, Linux, Docker, VS Code, Excel, Tableau

Soft Skills: Team Collaboration, Communication, Time Management, Analytical Thinking, Adaptability

CERTIFICATIONS

Generative AI in Education – University of Glasgow (Coursera)

Build a Machine Learning Web App with Streamlit and Python (Coursera)

Introduction to Computers and Operating Systems – Microsoft (Coursera)

ACHIEVEMENTS

Participant – Build with India Hackathon

Participant – Multiverse National Level 30 Hours Hackathon

Participant – JAIN University Hackathon

Captain – University Football Team, demonstrating leadership and team management
